Within maximum bookings?

The flowchart below shows an option for the logic to determine if the user is within the maximum number of bookings.

An example scenario with key terms

Max visits in a booking limitation period = 2
Booking limitation period = 4 weeks
Time period available = 5 weeks

Does the user currently have **less than** the max visits in a booking limitation period?

Yes

User can book any available date

No

For each currently available date

Would booking this date push the user beyond the maximum visits in a booking limitation period?

This **date should be displayed** to the user

Yes

No

This **date should not be displayed**

Are there any dates to be displayed?

Show the available dates to the user

Yes

No

Explain user is unable to book because they already have maximum number of bookings beyond
